

PCMH Participation Fee Differential Payments

Community Based Practice	Payment Type	Basis for payment	Payment Amount		
			Glide Path	NCQA Level 2 *	NCQA Level 3 *
Independent Adult/Pediatric	Enhanced reimbursement rate [1]	Specific PCMH Primary Care Codes –	14%	20%	24%
	PMPM [2]	Performance <i>Incentive</i> Payment		\$0.60	\$0.60
	PMPM [2]	Performance <i>Improvement</i> Payment		\$0.68	\$0.68

[1] Enhanced reimbursement rate applies to the specific PCMH primary care codes based on CT Medicaid fee-for-service base rates.

[2] Per Member Per Month (PMPM) Incentive and Improvement performance payments apply only to those members attributed to a PCMH practice and who are continuously enrolled over the calendar year. Attribution is determined by either member selection or by primary care specific services rendered. Thus, the actual number of HUSKY Health members attributed to a PCMH practice will be a subset of the practice's total HUSKY Health panel size and performance payments are adjusted accordingly.

Per DSS policy, Provider Bulletin 2016-06, as of July 1, 2016, hospital outpatient primary care clinics must enroll as a practitioner group(s) in the Connecticut Medical Assistance Program (CMAP) in order to bill for outpatient professional services. Once enrolled in CMAP, the group must complete and submit a DSS PCMH application for review and approval in order to participate in the DSS PCMH Program and receive the enhanced rate and be eligible for performance payments.

* **Note:** The National Committee for Quality Assurance (NCQA) released new standards for the PCMH process in April 2017 that eliminates level designation for recognition. Any practices recognized or renewing/sustaining their recognition with NCQA under the 2017 standards will receive a 24% enhanced rate as participants in the DSS PCMH program.
