

PROVIDER POLICIES & PROCEDURES

FOOT ORTHOTICS

The primary purpose of this document is to assist providers enrolled in the Connecticut Medical Assistance Program (CMAP Providers) with the information needed to support a medical necessity determination for foot orthotics. By clarifying the information needed for prior authorization of services, HUSKY Health hopes to facilitate timely review of requests so that individuals obtain the medically necessary care they need as quickly as possible.

Foot orthotics are removable shoe inserts that do not extend beyond the ankle and may include heel wedges and arch supports, which are available commercially or may be custom-made. The goal of treating conditions with foot orthotics is to decrease pain and increase function by controlling foot motion, reducing shock absorption, and minimizing stress forces. Foot orthotics are placed in a shoe (shoe inserts) to assist in restoring or maintaining normal alignment of the foot, relieve stress from strained or injured soft tissues, bony prominences, deformed bones and joints, and inflamed or chronic bursae. They may also correct some foot deformities and provide shock absorption to the foot. Foot orthoses may be used to treat conditions including those involving impaired peripheral circulation and sensation, when they are attached to a prosthetic shoe or orthosis, for a neurologic or neuromuscular condition and for congenital or acquired foot conditions.

Foot orthotics may be accommodative or functional. Accommodative foot orthoses are custom or non-custom inlays fabricated for the purpose of providing relief from callosities and pressure points, and maintaining the integrity of the longitudinal arch and/or the metatarsal heads. The devices can be made of several different types of materials and can be fabricated from plaster molds of the feet or electronic (computer) imaging in a semi-weight bearing or non-weight bearing, neutral position, with corrections built in to prevent abnormal compensation during the gait cycle.

A shoe modification is a medically prescribed alteration(s) to a shoe(s) to accommodate minor foot deformities, disabilities, or leg shortening of less than 1 and ½ inches. Shoe modifications, e.g., rocker soles, shoe buildups, metatarsal bars, shoe stretching, Thomas heels, tongue pads, Velcro closures, modified lacers, etc., may be applied to shoes, upon medical determination of need, to compensate for minor foot deformities.

CLINICAL GUIDELINE

Coverage guidelines for foot orthotics will be made in accordance with the Department of Social Services (DSS) definition of Medical Necessity. The following criteria are guidelines *only*. Coverage determinations are based on an assessment of the individual and his or her unique clinical needs. If the guidelines conflict with the definition of Medical Necessity, the definition of Medical Necessity shall prevail. The guidelines are as follows:

Individuals without a Diagnosis of Diabetes

I. Foot orthotics may be considered medically necessary ***for individuals without a diagnosis of diabetes*** when the following criteria are met:

A. The individual is 3 years of age and older;

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

1

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

AND

- B. **Has** a disorder of the foot resulting in pain, gait abnormality and/or impairments with activities of daily living which may include any of the following conditions:
1. Soft tissue disorders: acute or chronic plantar fasciitis, calcaneal bursitis or chronic ankle instability;
OR
 2. Inflammatory conditions: sesamoiditis, submetatarsal bursitis, synovitis, tenosynovitis, osteomyelitis or plantar fascial fibromatosis;
OR
 3. Musculoskeletal/arthropathic deformities: talipes deformities, pes deformities, in-toe or out-toe gait;
OR
 4. Vascular conditions: ulcerations, poor circulation, peripheral vascular disease, thromboangiitis obliterans or chronic thrombophlebitis.

AND

- C. For pre-fabricated foot orthotics: conservative treatment (over-the counter insoles, supportive shoes or athletic shoes, stretching and strengthening exercises, physical therapy, taping or non-steroidal anti-inflammatory drugs [NSAIDs]) has not adequately addressed the condition;
OR
- D. For custom-fabricated foot orthotics: There is a failure of, contraindication or intolerance to a prefabricated foot orthosis for congenital or acquired conditions that impair circulation, functioning or cause pain to the lower extremities.

Note: The medical justification for custom fabricated foot orthoses must be written by the ordering or prescribing physician.

II. Inserts, arch supports and other modifications to shoes for **individuals without a diagnosis of Diabetes** may be considered medically necessary when the shoe is an integral component of a lower extremity orthosis or prosthesis and medically necessary for the proper functioning of the orthosis or prosthesis.

Individuals with a Diagnosis of Diabetes

Inserts and other modifications to shoes **for individuals who have diabetes** may be considered medically necessary when the following criteria are met:

- A. The individual is experiencing diabetes associated foot complications (neuropathy, skin changes including drying, peeling or cracking skin, excessive callus formation, foot ulcerations and poor circulation);
AND
- B. Diabetic inserts will not address the problem (HCPC codes A5500 through A5514, located on the DSS MEDS-Medical/Surgical Supplies Fee Schedule).

Other orthotic modifications will be considered on a case-by-case basis in consideration of the individual's ambulation status, sensation, skin integrity, symptoms, and orthopedic alignment.

Not Medically Necessary

The following orthotic devices are typically not considered medically necessary; however, may be considered medically necessary based on an assessment of the individual:

- Foot orthotics for children under the age of 3*
- Separate orthotic devices for an additional pair of shoes
- Orthoses primarily for improved athletic performance or sports participation

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

- Orthoses considered experimental, investigational or unproven (this list may not be all-inclusive including) including:
 1. Custom-fabricated foot orthosis for the treatment of hallux valgus or hallux rigidus foot deformity
 2. Magnetic insole (i.e., orthosis with magnetic foil)

*Foot orthotics for children under the age of three are typically not considered medically necessary as prior to age 3, all children have flat feet. The arch at the inside of the foot does not typically begin to develop until that time. Children with flexible flat feet generally do not have foot pain. However, requests for foot orthotics for children under the age of 3 will be reviewed on an individual basis.

NOTE: EPSDT Special Provision

Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) is a federal Medicaid requirement that requires the Connecticut Medical Assistance Program (CMAP) to cover services, products, or procedures for Medicaid enrollees under 21 years of age where the service or good is medically necessary health care to correct or ameliorate a defect, physical or mental illness, or a condition identified through a screening examination. The applicable definition of medical necessity is set forth in Conn. Gen. Stat. Section 17b-259b (2011) [ref. CMAP Provider Bulletin PB 2011-36].

PROCEDURE

Prior authorization is required for foot orthotics including inserts, arch supports, and modifications to orthopedic shoes. Requests for coverage of foot orthotics will be reviewed in accordance with procedures in place for reviewing requests for orthotic and prosthetics. Coverage determinations will be based upon a review of requested and/or submitted case-specific information.

The following information is needed to review requests for foot orthotics:

1. Completed Outpatient Prior Authorization Request Form or completed on-line prior authorization request submitted via the medical prior authorization portal; **and**
2. A clinical assessment by the treating provider (performed prior to the referral for foot orthotics) supporting the medical necessity of the requested item(s) to include:
 - a. Current use of orthotics (if applicable); **and**
 - b. Functional gait analysis with and without foot orthotics (if applicable); **and**
 - c. Current health status, functional abilities/impairments; **and**
 - d. Subjective reports of pain, foot/ankle/forefoot muscle strength, range of motion, and any deformities or asymmetries; **and**
 - e. Vascular, skin and sensory status; **and**
3. Treatment history including:
 - a. Type of treatment(s) i.e., trial of NSAIDs, physical therapy, home exercise regimen, taping, use and type of supportive, athletic or orthopedic shoes for prefabricated foot orthoses; **and**
 - b. Length of trial(s); **and**
 - c. Effectiveness of treatments; **and**
 - d. If not effective, what factors contributed to treatment failure; **and**
 - e. If no trials of conservative treatment, reason why.
4. For custom-fabricated foot orthoses, justification written by the ordering or prescribing physician why prefabricated foot orthosis will not address the member's medical condition; **and**
5. Valid prescription; **and**
6. If applicable, supplemental documentation from the ordering or prescribing physician, physical therapist or orthotist that provides additional clinical information to support the medical necessity

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

of the requested foot orthoses.

EFFECTIVE DATE

This Clinical Guideline is effective for prior authorization requests for foot orthotics for individuals covered under the HUSKY A, C and D programs on or after October 1, 2012.

LIMITATIONS

Foot orthotics are NOT covered for individuals enrolled in the HUSKY B Program. Individuals enrolled in the HUSKY B program may be eligible for certain items under the HUSKY Plus Program. HUSKY Plus provides supplemental coverage of children with intensive physical health needs for services not covered under the HUSKY B Program. Covered items under HUSKY Plus Program include L3100 hallux-valgus night splint and L3150 foot abduction rotation bar. Call 1-800-440-5071 for more information.

CODES:

Code	Description
A5500	For diabetics only, fitting (including follow-up), custom preparation and supply of off-the-shelf depth-inlay shoe manufactured to accommodate multidensity insert(s), per shoe
A5501	For diabetics only, fitting (including follow-up), custom preparation and supply of shoe molded from cast(s) of patient's foot (custom molded shoe), per shoe
A5503	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with roller or rigid rocker bottom, per shoe
A5504	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with wedge(s), per shoe
A5505	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with metatarsal bar, per shoe
A5506	For diabetics only, modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe with off-set heel(s), per shoe
A5507	For diabetics only, not otherwise specified modification (including fitting) of off-the-shelf depth-inlay shoe or custom molded shoe, per shoe
A5508	For diabetics only, deluxe feature of off-the-shelf depth-inlay shoe or custom molded shoe, per shoe
A5510	For diabetics only, direct formed, compression molded to patient's foot without external heat source, multiple-density insert(s) prefabricated, per shoe
A5512	For diabetics only, multiple density insert, direct formed, molded to foot after external heat source of 230 degrees Fahrenheit or higher, total contact with patient's foot, including arch, base layer minimum of 1/4 inch material of Shore A 35 durometer or 3/16 inch material of Shore A 40 durometer (or higher), prefabricated, each
A5513	For diabetics only, multiple density insert, custom molded from model of patient's foot, total contact with patient's foot, including arch, base layer minimum of 3/16 inch material of Shore A 35 durometer (or higher), includes arch filler and other shaping material, custom fabricated, each
A5514	For diabetics only, multiple density insert, made by direct carving with CAM technology from a rectified CAD model created from a digitized scan of the patient, total contact with patient's foot, including arch, base layer minimum of 3/16 inch material of Shore A 35 durometer (or higher), includes arch filler and other shaping material, custom fabricated, each
L3000	Foot insert, removable, molded to patient model, UCB type, Berkeley shell, each
L3001	Foot insert, removable, molded to patient model, Spenco, each
L3002	Foot insert, removable, molded to patient model, Plastazote or equal, each
L3003	Foot insert, removable, molded to patient model, silicone gel, each
L3010	Foot insert, removable, molded to patient model, longitudinal arch support, each

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

4

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

L3020	Foot insert, removable, molded to patient model, longitudinal./metatarsal support, each
L3030	Foot insert, removable, formed to patient foot, each
L3040	Foot, arch support, removable, premolded, longitudinal, each
L3050	Foot, arch support, removable, premolded, metatarsal, each
L3060	Foot, arch support, removable, premolded, longitudinal/metatarsal, each
L3070	Foot, arch support, nonremovable, attached to shoe, longitudinal, each
L3080	Foot, arch support, nonremovable, attached to shoe, metatarsal, each
L3090	Foot, arch support, nonremovable, attached to shoe, longitudinal/metatarsal, each
L3100	Hallux-valgus night splint
L3150	Foot abduction rotation bar, without shoes
L3649	Orthopedic shoe, modification, addition or transfer, not otherwise specified
L5000	Partial foot, shoe insert with longitudinal arch, toe filler

DEFINITIONS

1. **HUSKY A:** Connecticut children and their parents or a relative caregiver; and pregnant women may qualify for HUSKY A (also known as Medicaid). Income limits apply.
2. **HUSKY B:** Uninsured children under the age of 19 in higher income households may be eligible for HUSKY B (also known as the Children’s Health Insurance Program) depending on their family income level. Family cost-sharing may apply.
3. **HUSKY C:** Connecticut residents who are age 65 or older or residents who are ages 18-64 and who are blind, or have another disability, may qualify for Medicaid coverage under HUSKY C (this includes Medicaid for Employees with Disabilities (MED-Connect), if working). Income and asset limits apply.
4. **HUSKY D:** Connecticut residents who are ages 19-64 without dependent children and who: (1) do not qualify for HUSKY A; (2) do not receive Medicare; and (3) are not pregnant, may qualify for HUSKY D (also known as Medicaid for the Lowest-Income populations).
5. **HUSKY Health Program:** The HUSKY A, HUSKY B, HUSKY C, HUSKY D and HUSKY Limited Benefit programs, collectively.
6. **HUSKY Limited Benefit Program or HUSKY, LBP:** Connecticut’s implementation of limited health insurance coverage under Medicaid for individuals with tuberculosis or for family planning purposes and such coverage is substantially less than the full Medicaid coverage.
7. **Medically Necessary or Medical Necessity:** (as defined in Connecticut General Statutes § 17b-259b) Those health services required to prevent, identify, diagnose, treat, rehabilitate or ameliorate an individual's medical condition, including mental illness, or its effects, in order to attain or maintain the individual's achievable health and independent functioning provided such services are: (1) Consistent with generally-accepted standards of medical practice that are defined as standards that are based on (A) credible scientific evidence published in peer-reviewed medical literature that is generally recognized by the relevant medical community, (B) recommendations of a physician-specialty society, (C) the views of physicians practicing in relevant clinical areas, and (D) any other relevant factors; (2) clinically appropriate in terms of type, frequency, timing, site, extent and duration and considered effective for the individual's illness, injury or disease; (3) not primarily for the convenience of the individual, the individual's health care provider or other health care providers; (4) not more costly than an alternative service or sequence of services at least as likely to produce equivalent therapeutic or diagnostic results as to the diagnosis or treatment of the individual's illness, injury or disease; and (5) based on an assessment of the individual and his or her medical condition.
8. **Prior Authorization:** A process for approving covered services prior to the delivery of the service or initiation of the plan of care based on a determination by CHNCT as to whether the requested service is medically necessary.
9. **Custom-fabricated orthosis:** An orthosis that is specifically manufactured for an individual.

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

5

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on “For Providers” followed by “Benefit Grids”. For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

Custom-fabricated devices may include custom-molded devices (e.g., molded to the individual's specific body part).

10. **Prefabricated or premolded orthosis:** An orthosis manufactured in quantity without a specific individual in mind. Prefabricated orthotic devices may include custom-fitted devices (e.g., trimmed, bent or molded for use by a specific individual) and can be modified with additions or use of heat to change the orthotic shape. An item delivered to fill a patient-specific doctor's order or healthcare prescription.
11. **Off-the-shelf insole:** An insole, arch support or insert that is sold off-the-shelf on a retail basis, which is not custom fitted or custom fabricated, and is not delivered to fill a doctor's order or healthcare prescription.
12. **Foot orthosis:** A type of shoe insert that does not extend beyond the ankle and may include heel wedges and arch supports. The goal of treating conditions with foot orthoses is to decrease pain and increase function. They may also correct some foot deformities and provide shock absorption to the foot. Foot orthoses may be used to treat conditions such as those involving impaired peripheral circulation and sensation, when they are attached to a prosthetic shoe or brace, for a neurologic or neuromuscular condition and for congenital or acquired foot conditions. HCPCS codes representing foot orthoses provided to individuals without diabetes are L3000–L3090.
13. **Foot Orthoses Associated with Prosthetic Shoes and Braces:** Prosthetic shoes are used when all or a portion of the foot is missing. A brace may or may not be attached to the prosthetic shoe. The absence of all or a portion of the foot may be the result of a congenital deformity, illness (amputation secondary to diabetic foot ulcer) or injury (traumatic amputation). Individuals with minor distal amputations typically do not require special shoes. When all digits have been amputated, a forefoot filler orthosis may be used with a commercial shoe. For more extensive partial-foot amputations (e.g., mid-level Trans metatarsal, Chopart's amputation), a prosthetic may be needed consisting of a conventional shoe with an ankle-foot orthosis (AFO), brace and a forefoot filler. A custom-fitted or custom-molded foot orthosis may be used as a replacement or substitute for missing parts of the foot (e.g., due to amputation) and when it is necessary for the alleviation or correction of illness, injury or congenital defect.
14. **Metatarsal bars:** Exterior bars that are placed behind the metatarsal heads in order to remove pressure from the metatarsal heads. The bars are of various shapes, heights, and construction depending on the exact purpose
15. **Offset heel:** A heel flanged at its base either in the middle, to the side, or a combination, that is then extended upward to the shoe in order to stabilize extreme positions of the hind foot.
16. **Rigid rocker bottoms:** Exterior elevations with apex position for 51% to 75% distance measured from the back end of the heel. The apex is a narrowed or pointed end of an anatomical structure. The apex must be positioned behind the metatarsal heads and taper off sharply to the front tip of the sole. Apex height helps to eliminate pressure at the metatarsal heads. Rigidity is ensured by the steel in the shoe. The heel of the shoe tapers off in the back in order to cause the heel to strike in the middle of the heel.
17. **Roller bottoms (sole or bar):** The same as rocker bottoms except the heel is tapered from the apex to the front tip of the sole.
18. **Wedges (posting):** Wedges are either for hind foot, fore foot, or both and may be in the middle or to the side. The function is to shift or transfer weight bearing upon standing or during ambulation to the opposite side for added support, stabilization, equalized weight distribution, or balance.

PUBLICATION HISTORY

Status	Date	Action Taken
Original publication	September 2012	
Reviewed	September 2013	Clinical Quality Sub-Committee Review. References Updated. Added "muscular stretching, strengthening exercises, taping, NSAIDS, over-the-counter insoles, and/or supportive shoes or athletic shoes" as additional examples of alternative medical approaches. Added statement "Custom-fabricated foot orthotics are not medically necessary unless there is clinical documentation that non-custom, prefabricated foot orthotics are not appropriate for the condition or diagnosis." These changes approved at the September 16, 2013 Clinical Quality Sub-Committee meeting.
Reviewed	September 2014	Clinical Quality Subcommittee review. Reference updated.

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.

7

To determine if a service or procedure requires prior authorization, CMAP Providers may refer to the *Benefit and Authorization Grids* summaries on www.ct.gov/husky by clicking on "For Providers" followed by "Benefit Grids". For a definitive list of benefits and service limitations, CMAP Providers may access the CMAP provider fee schedules and regulations at www.ctdssmap.com.

		Added additional documentation requirements for replacement of foot orthotics. These changes approved at the September 15, 2014 Clinical Quality Subcommittee meeting.
Reviewed	December 2014	Medical Management review. Clarified requirement for failure of conservative management prior to ordering custom foot orthotics. These changes approved by DSS on December 29, 2014.
Updated	August 2015	Updated definitions for HUSKY A, B, C and D at request of DSS.
Reviewed	September 2015	Clinical Quality Subcommittee Review. Reference Updated. Updated Information Required for Review section to include use of prefabricated and custom orthotics as part of treatment history and changed “ambulation skills with and without orthotics” to “ambulation skills with and without foot orthotics”. These changes approved at the September 21, 2015 Clinical Quality Subcommittee meeting.
Updated	March 2016	Updates to language in introductory paragraph pertaining to purpose of policy. Updates to Clinical Guideline section pertaining to Definition of Medical Necessity. These changes approved at the March 21, 2016 Clinical Quality Subcommittee meeting. Removed references to specific conditions in the Clinical Guideline Section. These changes approved by DSS on May 23, 2016.
Updated	February 2017	Update to reference section. This change approved at the February 22, 2017 Medical Review Policy Committee meeting. Approved by Clinical Quality Subcommittee on March 20, 2017. Approved by DSS on March 27, 2017.
Update	February 2018	Medical Policy Committee Review. Update to <i>Reference</i> section. Update to <i>Limitations</i> section. Update to HUSKY Plus phone number. Update to <i>Procedures</i> section, #4 under <i>The following information is needed to review requests for foot orthotics:</i> added <i>Type of footwear and effectiveness; i.e., non-supportive or supportive over the counter footwear, prescribed orthopedic above or below the ankle footwear.</i> Update to <i>Procedures</i> section #6 under <i>The following information is needed to review requests for foot orthotics:</i> added word <i>prefabricated</i> to #6a. Added #6d and #6e <i>Ambulatory effectiveness with and without current foot orthotics and Type of footwear and effectiveness; i.e., non-supportive or supportive over the counter footwear, prescribed orthopedic above or below the ankle footwear</i> Approved by CHNCT Medical Policy Review Committee

Please note that authorization is based on medical necessity at the time the authorization is issued and is not a guarantee of payment. Payment is based on the individual having active coverage, benefits and policies in effect at the time of service.
